

4 June 2020

Dear Member

We are aware of the outstanding permit applications from as far back as 12 February 2020 which we are chasing ITAC about several times per week.

In addition, we are also addressing the issue via DTIC, but it seems that they are stalling us in the basis that there is presently a scrap shortage in the country.

The subject is top of the exco's current agenda and receiving daily attention.

Members will be advised when we have more news.

Yours sincerely

MRA Administration
